DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-14, 21-23, 25 and 26 are rejected under 35 U.S.C. 102 (b) as being anticipated by McKee. Note column 6, lines 4-10 which describes controlling a bypass valve around the EGR cooler for preventing condensate from forming and column 6, line 60 through column 7, line 12 describes controlling a bypass valve around an intake charge cooler for preventing condensate from forming in the intake manifold.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3747

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 8, 15-17, 24 and 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKee. McKee discloses the claimed invention except for the particular intake manifold temperature settings to be maintained and for the utilization of a pneumatic controller for the bypass valve. It would have been an obvious matter of design choice to provide a bypass valve temperature controller to maintain a selective temperature setting for the intake manifold as long as it is high enough to prevent condensation. Furthermore, the use of a pneumatic controlled valve in place of the electronic controlled is obvious since these two type of valve controllers were art-recognized equivalents at the time the invention was made and one of ordinary skill in the art would have found it obvious to substitute a pneumatic controller for the electronic valve of McKee.

Allowable Subject Matter

Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 30-39 are allowed.

Response to Arguments

Applicant's arguments filed December 7, 2005 have been fully considered but they are not persuasive. The reference of McKee clearly discloses a control system for eliminating condensate either in the EGR cooler or in the intake manifold. In order to prevent condensate from forming, the temperature of the gases must remain above the dew-point temperature.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3747

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
